The 13th International Conference on Learning Representations (ICLR) 2025
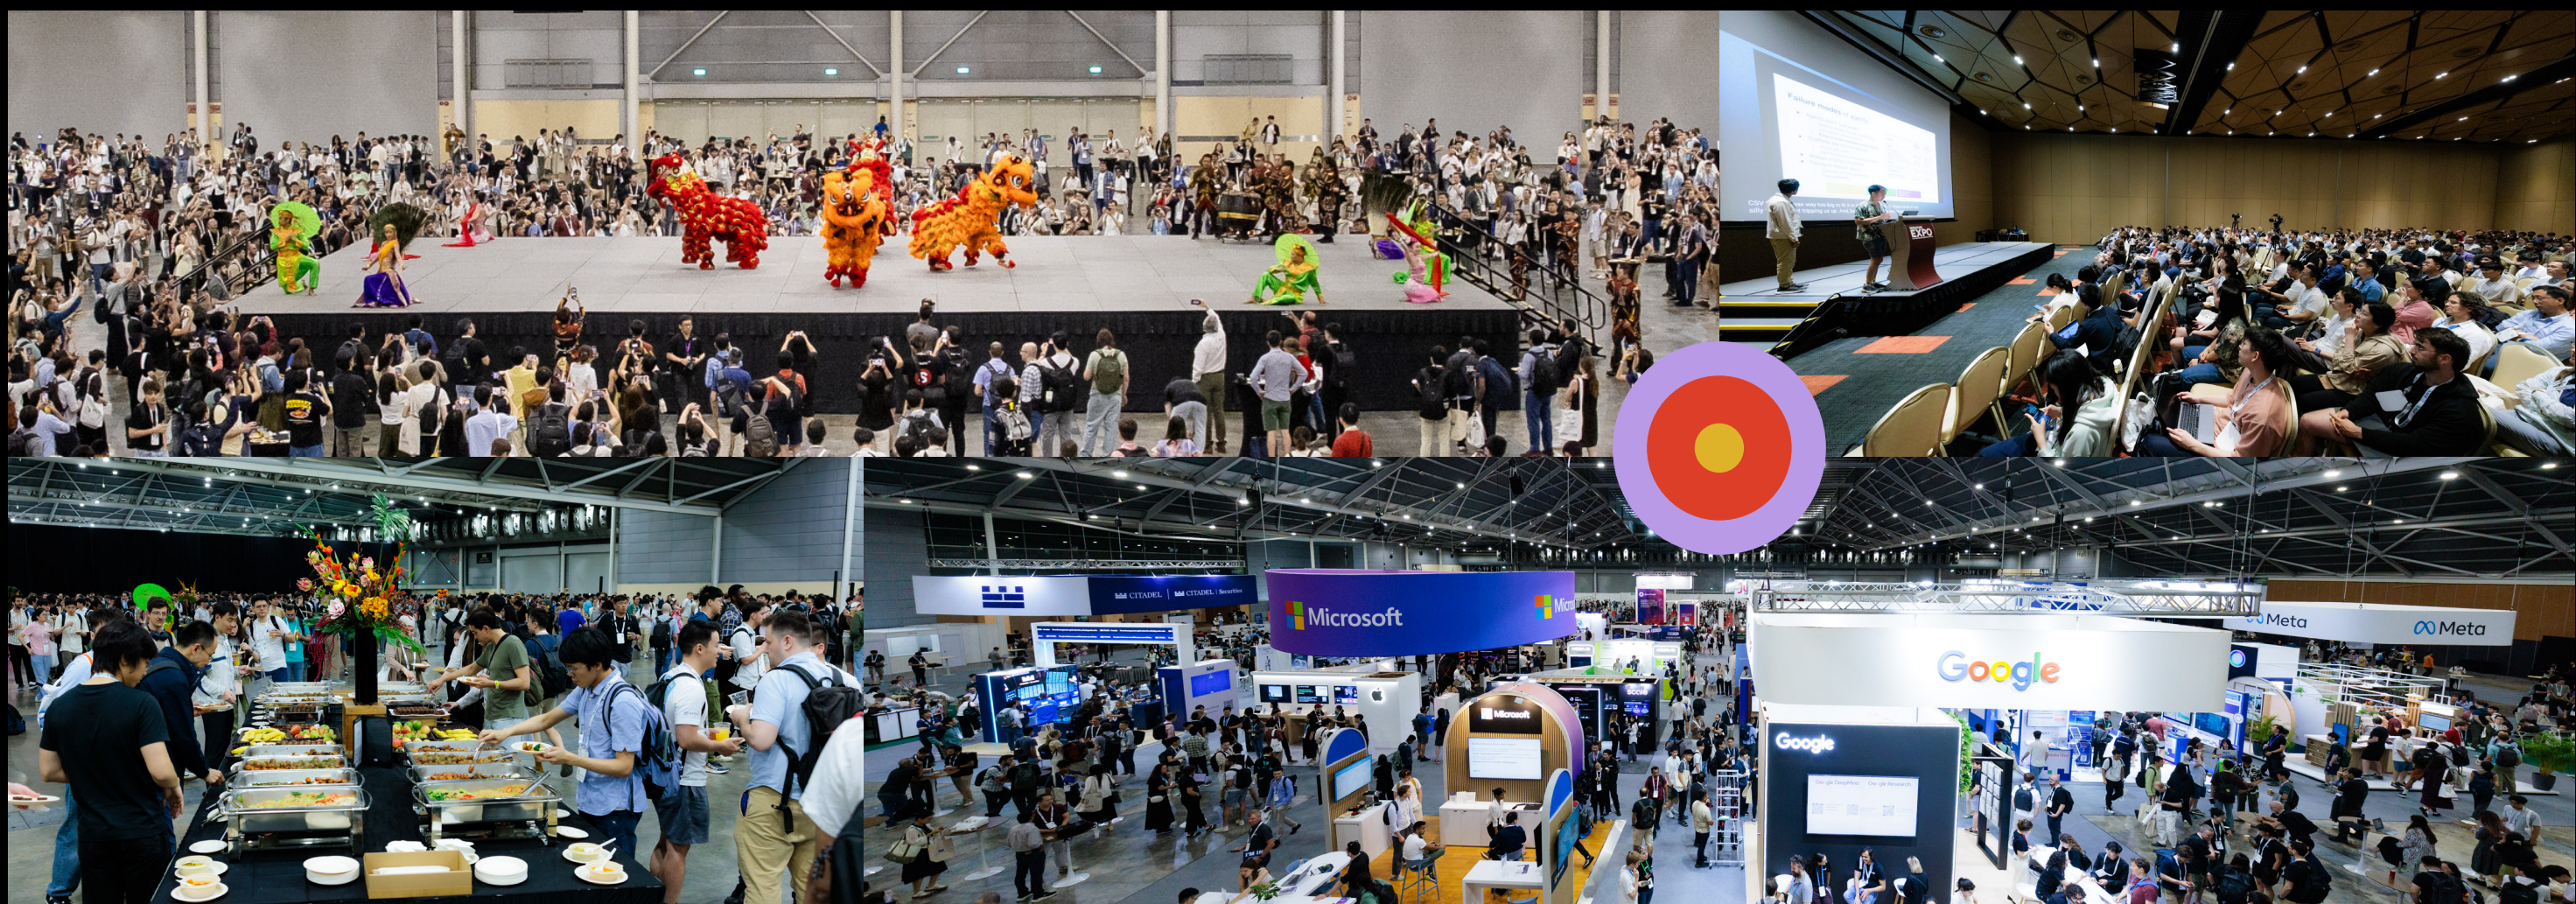

24 - 28 April 2025

The International Conference on Learning Representations (ICLR) 2025 made its Asia debut at Singapore EXPO. Held across Halls 1 to 4 and multiple meeting rooms within Singapore's largest purpose-built MICE venue, the event welcomed nearly 10,000 deep learning professionals from over 80 countries.

When it came to choosing a host country for the 2025 edition, Singapore stood out for its global connectivity, safety, and ease of doing business – as well as its strong local and regional artificial intelligence (AI) research community and proximity to Asia's innovation hubs.

As one of the world's fastest-growing AI conferences, ICLR 2025 quickly exceeded initial attendance projections, making a venue's scalability and versatility critical to its success. In response, Singapore EXPO supported the organisers by expanding the event's footprint from 20,000sqm to 40,000sqm of exhibition hall space, complemented by modular meeting rooms, to accommodate a diverse range of programme elements – including concurrent sessions, poster presentations, exhibitor booths, and networking spaces.

From the outset, Singapore EXPO also worked closely with the ICLR team to build flexibility into the planning process. The venue scaled up F&B operations and worked with its trusted network of partners to accommodate the increased demand – ensuring a seamless experience across all touchpoints. This strong support system allowed the organisers to stay focused on delivering quality content and fostering meaningful community engagement.

The successful execution of ICLR 2025 in Singapore underscores Singapore EXPO's capabilities as a leading MICE destination in Asia. With scalable infrastructure, hands-on operational support, and strong local partnerships, the venue enabled ICLR to deliver a smooth and professional event experience – further reinforcing Singapore's appeal as a strategic destination for global academic and innovation-led conferences.

"Singapore EXPO was great to work with. As we discussed the event's growth, they worked closely with us to immediately increase our catering capacity and proactively support the various programmes running throughout the conference. They were able to quickly expand and scale all the services we needed."

- Andrea Brown, Organiser, ICLR
